IUCN/SSC Polar Bear Specialist Group

With recent documentation of how warmer arctic climate might affect the sea ice habitat of polar bears, the predictions of even warmer climate in the next decades, and documentation of effects on polar bears subpopulations, an evaluation of the red list status of polar bear subpopulations was followed by an increased conservation designation of vulnerable. Gland, Switzerland and Cambridge UK, IUCN. For example, Rode and colleagues Rode et al.

IUCN/SSC Polar Bear Specialist Group

Graphing polar bear population estimates over time

The PBSG status table is being worked on and a new table with new and adjusted criteria will be published soon, most likely no later than end of February 2021.
