## Structural change, competition and income distribution

As regards the production structure, a diversified economic structure with a large share of knowledge-intensive activities is necessary for equality because it sustains growth and employment see ; and provides the income basis for taxes and transfers.

## Productivity, social expenditure and income distribution in Latin America

The evolution of the technology gap between a developing economy and an economy on the technological frontier depends on the efforts made by the developing economy to absorb, adapt and improve foreign technology. Faculty of Economics and Business.

## Trade, Reform, and Structural Transformation in South Korea

The variable labor productivity is used as a proxy for the diversification and knowledge-intensity DKI of the production structure ; the level of social expenditure as a percentage of GDP is used as a proxy for the strength of the institutions favoring equality or government effort to attain higher equality. OECD, 2000, Knowledge based industries in Asia, OECD, Paris. A decomposition analysis reveals that changes in the sectoral composition of the economy explain a considerable and increasing part of aggregate energy intensity dynamics.

## Human Resource Development, Structural Transformation, Employment Generation And Innovation: India, China, Japan And South Korea, 1990

The relative importance of these variables in different countries is analyzed and a typology suggested. Small and medium enterprises are integrated to the export chain values in Korea, in such a way that segmentation and asymmetries in capabilities across firms tend to be lower than those observed in Latin America. CONCLUDING REMARKS There have been significant advances in income distribution in most Latin American countries since 2004.

### **Structural change and convergence of energy intensity across OECD countries, 1970**

A higher investment in education would have little effect when structural change is absent.

### **Structural change and convergence of energy intensity across OECD countries, 1970**

For agriculture the RMSE declines by about 26 percent compared to the benchmark. An economy has a higher DKI as compared to other economy when it presents a large set of capabilities and in particular of knowledge-intensive capabilities.
