## Telehealth in the Developing World

The human experience: start from where the people are. ICT policy orientation in low- and middle-income countries Lack of reliable infrastructure is a severe constraint for low- and middle-income countries.

### Anderson, W. Ferguson (William Ferguson), Sir

These forces include industry developments in wireless and satellite systems, the spread of broadband communications, better access to applications and services, and increasing digital processing power and storage capacity. There are many, many things you can do to help, so please feel free to jump into the and ask what you can do to help! Geneva: United Nations Institute of Training and Research, 2005. In high- and low-income countries, e-health has already demonstrated its value, particularly in containing cross-border threats to health and safety.
