History of Statistics in Slovakia

We carried out a big benchmark revision of the annual and quarterly data for sectoral and national accounts from 1995 to 2017. In the period of extraordinary state and legal situation, from 1 October 1939 the name of the Office was changed to the Central Statistical Office and the State Statistical Office was constituted in Slovakia in 1940. For the needs of the EU, the international Labour Force Sample Survey in households has been extended by a module on reconciliation of work and family life.

In developing the Office's strategic management, we have focused on the implementation of programmes of the Strategic Development of the SO SR until 2017, contributing to the increase of its performance and fulfilment of certain projects of the Vision of the European Statistical System until 2020. It mostly concerned the revision of reporting system, concentrated on reducing the burden on reporting units and reducing the costs on surveys. Thus the SO SR realized 184 statistical surveys throughout the year.

In 2017, the implementation of the Agenda 2030 continued, The SO SR took on the task of chairing the Expert Group on Indicators and Monitoring whose main mandate is the production of indicators to the national priorities for implementing the 2030 Agenda. The preparation of the new regulation related to the system of national and regional accounts ESA2010 which shall enter into force was immensely important. Introduction of new indicators helps to describe more accurately short-time dynamics in Slovak economy during the economic crisis.

The Office completed successfully all the works in the field of national accounts, and in business statistics created the conditions for regular production and transmission of data files on internal and external foreign affiliates.

History of Statistics in Slovakia

The Office's preparation for the 2021 Population and Housing Census began with the activities of the Working Group for Census. It was aimed at obtaining information to what extent the availability of appropriate child and dependent care services affects the involvement of people in the workforce.
