The rhetoric of sector

COPES Carers Offering Peers Early Support is a program run by Carers ACT and patterned on one at Maroondah Hospital in Victoria recognising that carers in mental health need support when they first encounter the mental health system.

Design and implementation of a health management information system in Malawi: issues, innovations and results

Christon M Moyo, MPhil, Development Economics, has been the head of the Health Management Information Unit in the Ministry of Health and Population in Malawi since 1999. The Alliance balances practical guidance with vision.

[PDF] Case study of a 'successful' sector

Sector Wide Approaches SWAPs were born in the early 1990s. Chet N Chaulagai, Christon M Moyo, Jaap Koot, Humphrey BM Moyo, Thokozani C Sambakunsi, Ferdinand M Khunga, Patrick D Naphini, Design and implementation of a health management information system in Malawi: issues, innovations and results, Health Policy and Planning, Volume 20, Issue 6, November 2005, Pages 375—384, Abstract As in many developing countries, lack of reliable data and grossly inadequate appreciation and use of available information in planning and management of health services were two main weaknesses of the health information systems in Malawi. A health information policy, an indicators handbook, routine monitoring and guidelines for an annual health sector joint review were developed.

Aid alignment: a longer term lens on trends in development assistance for health in Uganda

ACCESS-HW is a project of the Public Health Institute PHI that generates and promotes research, leadership, and partnerships to advance public health worldwide. The Centre also works with consumers, carers, health professionals and the community to encourage positive attitudes to mental health. Some facilities still consider the submission of reports as the ultimate aim of the information system.

Sector wide approaches: opportunities and challenges for gender equity in health

Organization for Economic Co-operation and Development: Development Assistance Committee: Information note on the DAC Deflators. CDC supports and enables awardees to design and implement community-level programs that prevent chronic diseases such as cancer, diabetes, and heart disease. GOU resources for health have steadily risen from 25.

Sector Wide Approaches in Health Care: Do They Work?

This post lists some of the foundational tools available through the Stanford Social Innovation. They developed in settings where many donors were present and in response to overly complex aid architecture that in some cases was undermining the stewardship role of governments.

WHO/Europe

The introduction of this programme expedited data processing; however, this was at the cost of participation of programme coordinators in the process. The Strategy prioritizes prevention by integrating recommendations and actions across multiple settings to improve health and save lives.

Department of Health

The composition of performance indicators is expected to be different every year in order to prevent distortion from the emphasis on inputs given to particular programmes at the cost of other programmes not included in the composite indicator. Several players never receive reports, or else do not receive the information in a manner sufficiently customized to meet their needs.
