### NIMH » Mental Health and Rural America: Challenges and Opportunities

Instead, these challenges call for a social perspective with a focus on prevention and a healthy lifestyle. For more substance use treatment and prevention models, see. Whilst the introduction of accreditation criteria and award schemes has been subject to criticism and must always take social, economic and cultural variations into account, it is evident that it makes evaluation easier.

### Rural People with Disabilities Introduction

They certainly don't think about the refugees and the migrants that travel across this country harvesting the food that we all eat, but most of all they don't think about rural America. Funding evaluation within and across settings First, dedicated funding is required to enable TBE to be applied within and across a range of healthy settings initiatives in a coherent and co-ordinated way.

### Rural Development :: Sustainable Development Knowledge Platform

For instance, transport policy will impact on physical activity and mental well-being; mental health promotion programmes will interact with and impact on sexual behaviour, food-related behaviour and substance use; and wider regulations and action relating to advertizing and sponsorship will influence intra-institutional programmes focused on food and alcohol. We know that many that most rural states have the fewest choices in the ACA Marketplace.

### Healthy settings: challenges to generating evidence of effectiveness

Our aims were to identify evidence of: i work in settings that has reduced, or shown promise in reducing, health inequities; ii settings approaches that address social determinants of health; iii settings work addressing common social determinants such as gender and ethnicity and iv policy and programme work in settings. Despite negative health behaviors, many aspects of rural social life contribute to positive health outcomes. Generally, health care providers must be licensed in the state where the patient is receiving care, and states retain oversight of providers within their borders.
