Undressing *Lophodoris danielsseni* (Friele & Hansen, 1878) (Nudibranchia: Goniodorididae)

New York Shell Club Notes 322: 4. Study of their originally included species reveals that no useful purpose would be served by our attempting to preserve them through designating, as their types, such species as would then apply to taxonomic genera for which *Trichoda* and *Leucophra* would be the earliest available names.

Taxonomic Redescription of the Doridoxidae (Gastropoda: Opisthobranchia), an Enigmatic Family of Deep Water Nudibranchs, with Discussion of Basal Nudibranch Phylogeny

The time constant for sodium exchange increased linearly with internal sodium concentration, as did the fraction of sodium outflux insensitive to a maximally inhibitory concentration of external strophanthidin in the range of 10 to 80 mM internal sodium. We manipulated both factors by means of predator fecal scents and ungulate exclosures.
