## St. Paul's Cathedral, London

On top of the dome is a large lantern with a weight of 850 tonnes 936 short tons.

**An historical description of St. Paul's Cathedral. : Containing 1. The History of the Old Cathedral from its first Foundation, in which many curious Particulars, concerning its ancient Customs, Privileges, and Solemnities are recited. 2. An Account of the Manner of Proceeding in taking down the vast Ruins of the Old Cathedral, with the Discoveries and Observations made upon the Spot by Sir Christopher Wren. 3. A full Description of the founding, building, ornamenting, and finishing the present Structure, with Observations on its Beauties and Defects. 4. A full View of every Thing curious in it shewn to Strangers. 5. A Comparison of its Dimensions with those of the Old Church; and of the Dimensions of both with those of St. Peter's at Rome. To which are added, A Description of the Monument, Some Conjectures concerning London**

He wrote in his 1666 Of the Surveyor's Design for repairing the old ruinous structure of St Paul's: It must be concluded that the Tower from Top to Bottom and the adjacent parts are such a heap of deformities that no Judicious Architect will think it corrigible by any Expense that can be laid out upon new dressing it. The Normans reconstructed the church, which was recognized as the Old St.
