## International Youth Internship Program (IYIP)

Communication Canadian contributions of computer technology include the WATFOR compilers developed at the University of Waterloo and widely used in computer education in the 1970s and 1980s.

## Technology in Canada

For the UNESCO Science Report, several factors explain this trend towards greater international scientific collaboration. SCWIST promotes participation and advancement through education, networking, mentorship, collaborative partnerships and advocacy. It allows bulk goods to travel by water from the interior of the continent to the Atlantic Ocean.

## Launching Canada's Space Strategy

According to the Fijian Ministry of Health, research collaboration often results in an article being published in a reputed journal but gives very little back in terms of strengthening health in Fiji. Outside of such cases, which often are linked to national defense, a more decentralized model that relies on the ideas and initiative of individual researchers or small research groups may be most effective.

**Speech: “We must ensure that women’s participation in innovation is not the exception, but becomes the norm”—Lakshmi Puri**

Additional portal services will be provided by the NeurOK Company. The economic arguments for government support of innovation generally imply that governments should focus particularly on fostering basic, or foundational, research. Finally let us not forget that the resolution declaring the international day was adopted in 2015 around the time of three epic intergovernmental normative commitments and processes.

## Government's Role in Promoting Research and Development

If many people are able to exploit, or otherwise benefit from, research done by others, then the total or social return to research may be higher on average than the private return to those who bear the costs and risks of innovation. In the 1920s, perfected the electrically operated variable-pitch

propeller, which was adopted around the world.
