Autonomous vehicle interactions in the urban street environment: a research agenda

AV deference was exemplified by a chance encounter between a Google AV and a cyclist during a test drive on a public road in Austin, Texas. OUTSIDE AGENCY INVESTIGATE MISCONDUCT 8 in 10 support having outside law enforcement agencies investigate alleged police misconduct rather than leave the investigation to the local police department.

Assessing the social climate of physical (in)activity in Canada

All inputs were prepared for each modelling window. Second, humans communicate their intentions on the road network in subtle and tacit ways. The system design is illustrated schematically in Figure 5.

How drones can save the public sector £1bn

Research questions by theme Thematic area Research questions AV interactions with motor vehicles MV 1. Regarding subjective data, the majority 88.

Urban Traffic

It is true that low-density environments create more vehicle miles of driving per capita or per household than high-density environments. The principle is illustrated in Figure 44.
