**Définition 2 :** Une série statistique est l'ensemble des valeurs collectées.

On distingue deux types de séries :

- série statistique **qualitative** : le caractère n'est pas mesurable ; on parle plutôt de **modalités**.

- série statistique **quantitative** : le caractère étudié peut faire l'objet d'une mesure ; on parle de **variable**.

On distingue deux types de variable quantitative :

- ..... : le caractère étudié ne prend pas de valeurs intermédiaires

- ..... : le caractère étudié peut prendre toutes les valeurs d'un intervalle, de façon « continue ».

**Remarque :**

Une variable discrète peut devenir une variable continue par regroupement de classe.

Tout dépend de la pertinence du regroupement.

### UNSD — Energy Statistics

« Parmi les thèmes à propos desquels les statisticiens ne sont pas d'accord, se trouve la définition de leur science.

### Statistique — Wikipédia

It further recognizes population and housing censuses as an important source for supplying disaggregated data needed for the measurement of progress of the 2030 Agenda for Sustainable Development, especially in the context of assessing the situation of people by income, sex, age, race, ethnicity, migratory status, disability and geographic location, or other characteristics. On the other hand, an average Joe may use soccer stats such as Over 2. Enfin, on peut chercher à modéliser un phénomène a posteriori.

Or, si l'intégralité de ces valeurs forme l'information, il n'est pas aisé de manipuler plusieurs centaines voire milliers de données, ni d'en tirer des conclusions. The Council requested the Committee of the Chief Statisticians of the United Nations System to more effectively strengthen coordination of statistical programmes within the United Nations system, and requested the Statistics Division to provide adequate support to the coordination function of the Statistical Commission as well as related activities of the Committee, by considering pursuing, inter alia: a road map and action plan for the United Nations statistical programme to be considered by the Statistical Commission. Sans la , un calcul sur des données par exemple une moyenne , n'est qu'un indicateur.
