Journal of Japan Society of Civil Engineers, Ser. B1 (Hydraulic Engineering)

We evaluate the accuracy using the capturing ratio that indicate the proportion of cases where regulation is issued by forecasted values among cases where regulation is issued by actual values and the predictive ratio that indicate the proportion of cases where regulation is issued by actual values among cases where regulation is issued by forecasted values.

Activities by NGOs and CBOs : Japan

The choice of small areas provides a simplified complexity and facilitates understanding of the basic processes which underpin river basin dynamics. Science in predicting and warning of tsunamis will continue to improve in the future, but as seen above, preventing damage is a much tougher task. Each issue is devoted to one particular subject.

Case Studies

The result verified our model can estimate highly accurate occurrence location. In 31 prefectures out of 46 prefectures except for Okinawa prefecture of Japan, the damage cost of only flood is larger than that of only storm surge and the compound disasters.

Journal of Japan Society of Civil Engineers, Ser. B1 (Hydraulic Engineering)

Through the use of GPS buoys and Ocean bottom pressure gauges, the MRI was able to assess the magnitude of offshore tsunamis. Among the multipartite, single-purpose agreements pertaining to the Rhine, for example, are: — the Convention of Mannheim, Oct. One or more issues may cover the activities and scientific studies of the Athens Center of Ekistics carried out during the year; other issues may contain the discussions which take place during the International Programs organized by the Athens Center of Ekistics or other organizations focusing on the study of Human Settlements.
