If people do decide they need to form a Christmas bubble, they need to take precautions to minimise risk. The first formal review of tiers will take place on Wednesday 16 December, but due to a sharp rise in cases these areas will move to tier 3 from 00. Property values are higher and opportunities to appropriate land for highway improvements are fewer.

Annual Travel to Work survey

Micro-simulation allowed the collection of detailed information on the number of lane changes, the individual journey times of each vehicle passing through the network, and a count of urgent manoeuvres to avoid collisions. This is a great way to improve overall employee satisfaction.
