Its structure mirrors that of the Executive Board and its 24 constituencies.

The Future of Global Governance: Developing a Global Financial Safety Net?

This analysis is similar to Figure 10. As steps forward we should also include the decision to extend membership of global financial regulatory institutions to major emerging economies and the strengthening of the regional financial safety nets, notably in Western Europe and East Asia, in the latter case through the expansion of the Chiang Mai Initiative launched after the 1997 East Asia crisis.

GLOBAL MONETARY GOVERNANCE

□ "Governance without government"

- No central authority: governance must rely on cooperation among sovereign governments

■ Two problems

- Compromises are inevitable; the rules will always be sub-optimal
- Violations are likely; behavior will be imperfect, too

analysis of long-term global trends, highlighted the importance of expanding global governance over the next 20 years. Although, from the beginning, the allocation of quotas has been intended to be based on formulae, in practice actual quotas have emerged from complex bargaining between member countries during each review. The major powers and especially the United States, have used war as a means of resolving conflicts and may well continue to do so.

The Status Quo Crisis

Digital currencies are often cited as a tool for financial inclusion, but this opportunity can be realized only when paired with good governance.

About the IMF: Governance Structure

On the other hand, globalization of communication is facilitating the development of global civil society movements. Additionally, the and the FSB promote overall coordination and cooperation by regularly bringing together overseers of the global financial system

Making the Global Financial System Work For All

For example, assuming a capital account balance of zero thus no asset transfers available for financing, a current account deficit of £1 billion implies a financial account surplus or net asset exports of £1 billion. However, they must prevent their governance structure from being characterized by the excessive power of large countries, as this would defeat the basic political economy argument in favour of these institutions: the greater voice that is granted to small- and medium-sized countries. Today, the World Bank continues to make loans to middle-income countries with access to private markets.

Global financial system

Developmental Finance in an Age of Productive Incoherence

Whereas there needs to be an overhaul of global economic governance, giving a greater role to emerging economic powers, it is still necessary for the US to retake leadership in the IMF and in global economic governance, but now it will need to indicate that it is willing to share it with a resurgent China. This process has not ceased and now includes the creation in 2015 of a new inter-regional bank, the New Development Bank, and a new regional bank, the Asian Infrastructure Investment Bank.
