Mercury Detox: Mercury Toxicity, Testing, and Methods

If you do a lot of gardening, wear gloves when digging in soil to limit skin absorption. Adding freshly to a glass of water can keep your body hydrated, which in turn can help flush out toxins.

Mercury Detox: Mercury Toxicity, Testing, and Methods

New York, NY: McGraw-Hill; 2002:1239.

How to safely remove mercury from your brain and body

Removing the Source of the Poison: Filling Removal The first step in any mercury detoxification process is to remove the source of the poison.

How To Use Food For Natural Detox Of Mercury From Your Body — The Detox Specialist

Mercury is a very powerful neurotoxin — a substance that causes damage to a nerve cell or nerve tissue. Even after the fillings have been removed everyone will begin with serious deficiency of glutathione. It is perfectly reasonable to conclude that mental decline could be related to mercury toxicity.

Mercury Detox: Mercury Toxicity, Testing, and Methods

Another study found that chlorella intake may help counteract heavy metal poisoning in rats when exposed to cadmium by decreasing cadmium absorption in the body. She also discussed the possible link between thimerosal in vaccines and autism.

Mercury Detoxification from A to Z

Mercury is also eliminated in urine, so drinking extra water can help to speed up the process. You can also try even stronger laxatives if you have to such as senna or cascara. Finally, pair your new diet with detoxifying activities such as hot yoga for quicker results.

How to Do a Mercury Detox: Your Ultimate Guide

Here is a guide that will help you reduce the levels of mercury in your body and reduce your intake of it. But vaccines may be more problematic than all of these.

How To Use Food For Natural Detox Of Mercury From Your Body — The Detox Specialist

If you think you have mercury poisoning, talk with your doctor. Mercury is the most poisonous naturally-occurring, non-radioactive substance on earth, many times more toxic than arsenic, lead, or cadmium.
