CARB Research Contract Search Results

Missing Days 1hr Number of days in the year presumed not to have exceeded the level of the 1-hour standard even though the requisite number of 1-hour values were not available. A pollutant measured every six days would produce about 60 samples per year. At the dissemination area DA level, Toronto had the highest binary CHI score across the cities at 3, with above-benchmark values for PM 2.

Air Quality Pollutants and Standards

SO₂ 99th %ile For Sulfur Dioxide, the 99th percentile of the daily max 1-hour measurements in the year. Obs Number of observations reported for the year.

ShieldSquare

This means that in some cases, air pollution was not the only risk factor but one of several. Additional Title V requirements relate largely to permitting procedures, and requirements for monitoring, recordkeeping, and reporting. Changes are largest over central and eastern Europe for clear sky conditions, indicating that aerosol radiation interactions are dominant here, but for all-sky conditions the changes are largest over western Europe, signifying that aerosol cloud interactions are more important here.

Concepts of human exposure to air pollution

Download figure: We note a few key features of interest in figures and. Furthermore, California districts will have to adopt and implement programs that meet the requirements of this new regulation.

About Air Data Reports

In this work, the binary CHI emphasizes NO₂ and PM_{2.5}. In the AQS database, this identifier is called parameter occurrence code POC.

The Regulation of Stationary Sources

O₃ - Ozone 1-Hour values Hourly average concentrations measured by monitoring equipment and reported to AQS. Required Days 1hr Number of days in the year when ozone monitoring is required. As a result, emissions of attainment pollutants may be regulated by both NSR and PSD rules.

ShieldSquare

Rules addressing proper operation provide the same for granting operating permits.

ShieldSquare

Non-overlapping means that the 8-hour averages do not include any of the same 1-hour values.
