## Stability of general multi

If  $N$  is a non-Archimedean fuzzy Menger norm on  $X$ , then the triple  $X, N, T$  is called a non-Archimedean fuzzy normed space.

## Stability of general multi

A field endowed with a valuation mapping will be called a valued field.

## Functional Equations and Inequalities

$N_g$ : Uniqueness theorems in the theory of functional equations and related homotopy.

## Stability of general multi

We also note that Definition 2. The usual absolute values of  $R$  and  $C$  are examples of valuations. Schwerdtfeger: Remark on an inequality for monotonic functions.

## Functional Equations and Inequalities

Moreover,  $N$  stands for the set of all positive integers and  $R$  respectively,  $Q$  denotes the set of all reals respectively, rationals.
