### Rural Health Clinics (RHCs) Introduction

Survey instruments could be improved to determine if doctors in open practices access some or all new patients, by type of insurance. Tax credits also will subsidize small businesses with fewer than 25 employees.

### Services Not Covered by Medicare

The aggregate data means CHCs can look at trends across populations and compare outcomes by different communities, different CHCs, or different demographic groups. In the case of the transfer of a hospital from ownership by a State to ownership by a nonprofit corporation without monetary consideration, the basis for capital allowances to the new owner shall be the book value of the hospital to the State at the time of the transfer.

### Social Security Act §1861

The Secretary shall coordinate surveys for determining certification under this title so as to provide, to the extent feasible, for simultaneous surveys of an entity which seeks to be certified as a hospice program and as a provider of services of another type. Such regulations shall take into account both direct and indirect costs of providers of services excluding therefrom any such costs, including standby costs, which are determined in accordance with regulations to be unnecessary in the efficient delivery of services covered by the insurance programs established under this title in order that, under the methods of determining costs, the necessary costs of efficiently delivering covered services to individuals covered by the insurance programs established by this title will not be borne by individuals not so covered, and the costs with respect to individuals not so covered will not be borne by such insurance programs, and ii provide for the making of suitable retroactive corrective adjustments where, for a provider of services for any fiscal period, the aggregate reimbursement produced by the methods of determining costs proves to be either inadequate or excessive.

### **Attracting and Retaining Physicians Through Benefits**

For surveys conducted in multiple languages e. These modifiers are not required by Medicare, but do allow for clean claims processing and billing to the patient.

### **NCHS**

Any discharge planning evaluation must be made on a timely basis to ensure that appropriate arrangements for post-hospital care will be made before discharge and to avoid unnecessary delays in discharge.
