L'écriture méroïtique

This comes up at many points, but it is perhaps nowhere clearest than in the third chapter, 'Linguistic Affiliation', which is central to the arguments of the book. It inherited from the former Egyptian colonisation cultural patterns that are obvious in religious and ideological fields as much as in institutions or artefacts.

But he completely ignores Rowan's working paper the same year that evidences serious phonetic problems with the hypothesis that Meroitic could be a Nilo-Saharan language, and suggests instead that what we know of Meroitic consonant compatibility suggests that it may, instead, be Afro-Asiatic. Pour marquer des consonnes seules, on utilise les signes consonne-voyelle associés au signe pour « é » ou « e » muet.
