### Biopsychosocial model of illnesses in primary care: A hermeneutic literature review

We adopted this approach in light of pragmatic resource constraints.

#### Short

Comprehensive biopsychosocial evaluation and patient care are time-consuming, and need better competence among doctors in performing biopsychosocial practice. Heart Lung Circ 2018 Jul;27 7 :893-8. Short-course oral steroids as an adjunct therapy for chronic rhinosinusitis.

#### Short

This is an open access journal, and articles are distributed under the terms of the Creative Commons Attribution-NonCommercial-ShareAlike 4. The process of the hermeneutic literature review is iterative and consists of two main steps as follows: the search and acquisition of articles and the analyses and interpretation of articles obtained.

### of Pulmonary Embolism Defined in the Primary Literature: A Narrative Review

For certain advance lung disease, non-invasive ventilation maybe necessary. Data Collection and Review We screened titles and abstracts of all references and then full texts as indicated.
