Performance resins in tire compounding.

At this point 75 grams of the powdered resin of Example 1 but containing no hexamethylene tetramine were slowly added with continued stirring.

Performance resins in tire compounding.

III 2, 745 265 93 TABLE 7. This changes the aliphatic-aromatic balance of the resin, reduces color and improves stability.

SI Group

SCHUEBE 1992-07-16 D2 Grant after examination 1993-01-21 8364 No opposition during term of opposition. By way of comparison a similar composition containing no reinforcing resin was prepared :-and also similar compositions containing a novolak reinforcing resin sold under the trade name Cellobond 12010. The results obtained are shown in Table 4A.

US3455851A

Thereafter, cyclohexane under a vacuum of 0.

CELLOBOND™ Resin J2042X

Solubility POLYTONE AP 130 is soluble in esters, ketones, aromatic and aliphatic chlorinated hydrocarbons. In this process step be the viscosity of the rubber solution and the aqueous emulsifier solution aligned with each other so that the Shearing force, thereby enabling that the size of the emulsified particles is minimal and equal can be kept shaped.

CELLOBOND™ Resin J2042X

Vulcanized rubber products 'formed from vulcanizable rubber mixtures containing the rubber reinforcing compositions according to the present invention have excellent properties.

High Styrene Resins

Nach festgelegten Zeiten wird der Korrosionsgrad der Aluminiumverdrahtung geprüft. POLYTONE AP 132 is used as a reinforcing resin in tire beads, shoe soles, apex strips and co-extruded window profiles.
