High Compliance Randomized Controlled Field Trial of Solar Disinfection of Drinking Water and Its Impact on Childhood Diarrhea in Rural Cambodia

The study compared diarrheal incidence among the intervention group children who were exposed to SODIS household water treatment and the control group children who were not exposed to such water treatment. This toilet uses the technology that allows urine and feces to be collected separately as fertilizer. This could be the reason for the control group household report of a 1.

Urban rainwater harvesting systems: Research, implementation and future perspectives

Catalysts 2019, 9 1 , 46.

The effect of SODIS water treatment intervention at the household level in reducing diarrheal incidence among children under 5 years of age: a cluster randomized controlled trial in Dabat district, northwest Ethiopia

The arable areas in the two soil types are subdivided into irrigated and non-irrigated, sprayed and non-sprayed, and low and high fertility areas to represent low and high input environments. With a global focus, the pertinent practical, theoretical and social aspects of RWH are reviewed in order to ascertain the state of the art.

Comparing Willingness to Pay for Improved Drinking

The mean \pm standard deviation SD ages of the adult respondents and the U5C were 30.

Use of Household Water Treatment and Safe Storage Methods in Acute Emergency Response: Case Study Results from Nepal, Indonesia, Kenya, and Haiti

The Seed Vault provides an insurance against the loss of seeds in genebanks, as well as a refuge for seeds in the case of large-scale regional or

global crisis.

The effect of SODIS water treatment intervention at the household level in reducing diarrheal incidence among children under 5 years of age: a cluster randomized controlled trial in Dabat district, northwest Ethiopia

It suggests institutional arrangements and policy recommendations required to improve uptake of RWM interventions at local, national, and regional levels. Desalination and Water Treatment 2016, 57 50 , 23719-23727.

Facilities and services

He carried out the pre-tests together with Bianca van der Kroon, and entered the data in a database. Phenotyping facility for chickpea diseases Ascochyta blight and Botrytis gray mold The Ascochyta blight AB and Botrytis grey mold BGM phenotyping facility at ICRISAT allows scientists to analyze phenotypes for chickpea cultivars against these economically important diseases in great detail.

SamSamWater

In 2001 the government adopted a water and sanitation strategy that called for more decentralized decision-making; promoting the involvement of all stakeholders, including the private sector; increasing levels of cost recovery; as well as integrating water supply, sanitation and hygiene promotion activities.
