Lomborg, B. (2001) The Skeptical Environmentalist Measuring the Real State of the World. Cambridge University Press, Cambridge.

Annual death rate from catastrophes 1900—99, per decade, for natural disasters. Unfortunately, this is not that book.

The Skeptical Environmentalist

Proportion of starving in the developing world by region, for 1970, 1980, 1991, 1997 and estimates 2010.

The Skeptical Environmentalist: Measuring the Real State of the World by Bjorn Lomborg

Due to the scope of the project, comprising the range of topics addressed, the diversity of data and sources employed, and the many types of conclusions and comments advanced, The Skeptical Environmentalist does not fit easily into a particular scientific discipline or methodology. The number of examples are so overwhelming that they could fill a book of their own. Proportion of useful time spent by British men on various activities, 1856—1981.

The Skeptical Environmentalist: Measuring the Real State of the World

This is our political aim. NAPAP experiment showing growth in diameter of 2- to 5-year-old seedlings exposed to various levels of simulated acid rain. Life expectancy for industrialized countries, developing countries, sub-Saharan Africa, and the entire world 1950—2050.

The Skeptical Environmentalist: Measuring the Real State of the World

Finally, it is regrettable that Lomborg did not give more prominent recognition to Julian Simon and Ed Regis, the subject and author respectively, of the magazine article that first interested him in this work. Annual average concentration of SO₂ in the US 1962—99 and the UK 1962—97.
