Men's Health: MedlinePlus

Aim for high-fiber carbohydrate sources — they tend to be high-quality. The global gap between the life expectancy of men and women has remained at approximately 4.

Men's Sexual Health

A major reason for consuming alcohol is to change mood or mental state. Evidence shows that people who consume high amounts of alcohol or abuse substances are vulnerable to an increased risk of developing mental health problems.

Men's Health: MedlinePlus

Ask your doctor about the potential benefits and risks of adding a multivitamin or other supplements to your daily routine. Additional factors that contribute to the disparity in suicide rates between men and women include the pressures of traditional gender roles for men in society and the socialization of men in society.

Men's Health

Bulletin of the World Health Organization. If you have a busy schedule, you may find it hard to make time for regular exercise or find yourself eating a lot of takeout and junk food. For instance, depression, and suicidal thoughts may manifest in the form of anger, hostility, and irritability.

Men's health

Although the research is not yet final, some findings suggest that your risk of endometrial cancer and lung cancer may be lower if you get regular physical activity compared to people who are not active.

Men's Health

In terms of behavioural factors, men have higher levels of consumption of alcohol, substances, and tobacco compared to women, resulting in

increased rates of diseases such as , , and. Some conditions that affect both men and women, such as , and , also manifest differently in men.
