Decision Making for the Environment: Social and Behavioral Science Research Priorities.

3 Frameworks for Ethical Decision

Buildings are major consumers of energy in the United States. Dams and Development: A New Framework for Decision-Making is vital reading on the future of dams as well as the changing development context where new voices, choices and options leave little room for a business-as-usual scenario. The Navajo station, for instance, used 13.

An optimization framework for building energy retrofits decision

This process highlighted the value of using a collaborative approach to reduce both the time and litigation needed to resolve critical policy issues. This study proposes a dynamic decision-making scheme that simulates strategies of the perishable food market under different circumstances. Pumped storage for secondary hydroelectric generation is an economical way of providing required peaking power.
