Robert Neimeyer

In this study, the two groups i. HCRI offers 17 stuttering therapy programs annually and has treated 6,000 people from across the U. The only thing I have left to hold onto are those times when Nichole loses her confident edge and decides to crawl back to me for safety.

8 Talking back to stuttering: constructivist contributions to stuttering treatment.

Significantly, the recommended ratio of commenting on and praising stutter-free speech compared to stuttered speech is five-to-one. We also provide illustrative material. We believe that one of the most important tasks we can undertake is to make our treatment program more broadly available.

Robert Neimeyer

The group meets weekly to practice specific speech skills learned in therapy and help one another maintain fluency. Relapse following treatment for stuttering: A critical review and correlative data.

Robert Neimeyer

Nobody enjoys being an alcoholic, staying in an abusive relationship, or walking around as a morbidly overweight person.

Personal change and reconstruction; research on a treatment of stuttering.

Personal change and reconstruction: Research on a treatment of stuttering.

Personal Construct Theory

Follow-up, which varied from three months to one year, was conducted with nine of the 16 participants and revealed one participant who had regressed and eight who had maintained or improved their level of fluent speech. The research confirmed that the of personal construct theory was wide enough to encompass the problem of stuttering; a therapy programme was designed based on the theory of stuttering; and it was demonstrated that as speech behaviour changed, so did construing of how the person saw themselves. In this chapter we extend this approach to treatment by offering a constructivist conceptualization of stuttering, summarize the growing evidence base for its major tenets, and outline its novel implications for stuttering therapy.

9780122661501: Personal change and reconstruction;; Research on a treatment of stuttering

EXAMPLES OF QUESTIONS THAT MIGHT BE USED IN NARRATIVE THERAPY WITH A PERSON WHO STUTTERS ADAPTED FROM DILOLLO, ET AL. In fact, only inasmuch as you understand yourself--including the full ramifications of and reasons for your actions and inactions--are you truly able to choose one path over another. You can make a difference in the lives of others who stutter.

The HCRI Blog

The essential point is that, in the near future, we will be creating several different methods for implementing remote access fluency skill training. Clients had to press a control button to activate the Voice Monitor for each trial with single syllable utterances or to reset the green light when an error was made in connected speech. A monstrous block that comes out of nowhere during a phone call, or an embarrassing comment from a stranger can be all it takes to quash the newfound fluency.
