Monthly Vitamin Subscription Service

Tanzanite was added as a modern birthstone in 2002. With a strong technological foundation, based on invention and innovation, our global centers of excellence provide best available technology and services to our clients, supported by robust expertise and a highly competent and quality-driven human resource base, enabling our clients to achieve growth and sustainability throughout their value chain.

Gem Games

Moonstone also occurs in pink, orange, near-colorless and other colors. Natural alexandrite of good color and clarity is an extremely expensive gem, however, lab-created alexandrite can be found in many jewelry stores.

Gains in the Education of Mathematics and Science (GEMS)

The accompanying photo shows a collection of faceted tourmalines of various colors.

GEMs URL Creation Tool

Choose one of the online gem games for free and have fun collecting various jewels. A myAlaska account is required to authenticate your identity. About 80% of the zircons sold today are blue, with the color produced by treatment.
