Chapter 3 takes a more detailed look at electricity generation and thermal efficiencies associated with it. Australian Bureau of Statistics Catalogue No. Total carbon dioxide equivalent CO<sub>2</sub>-e emissions for these three gases increased by 19% over that period from 285,168 to 339,597 Gg.

### #1992 93/9 Real Estate Settlement Accounts

GREENHOUSE GAS EMISSIONS, Allocated to Final Uses-1994-95 ENERGY STOCKS Australia's abundance of fossil fuel and mineral reserves underpins our patterns of energy production and use.

### **British Columbia Public Accounts 1992**

Secondary energy products include thermal electricity, which is derived mainly from coal, and refined petroleum products e. Australia was actively involved in the Kyoto negotiations and argued for differential emissions targets depending on circumstances in each country.

### **Buy 1992**

Most historical data provided by Dan Diamond and Associates. Total transport activity, including industrial and domestic use of motor vehicles, contributes about one quarter of these emissions. Overwhelmingly, domestic fuel use is dominated by the fossil fuels coal, oil and gas, and their derivatives.
