## The great university con: how the British degree lost its value

Consequently, the answer to our first research question is simple: grades at secondary institutions have risen in the time period we examine; however, postsecondary grades have declined. That is a great difference between America and other countries, and it is one of the reasons why our colleges remain the best in the world, despite our high schools being generally mediocre in international comparison.

### **The great university con: how the British degree lost its value**

The literature supports the idea that grade inflation is rampant throughout higher education. Declines in the association between grades and these important antecedents and outcomes could indicate the declining signaling power of grades and be grounds for concern.

### **Grade Inflation ... Why It's a Nightmare\***

This places students in more stringently graded schools and departments at an unfair disadvantage, unless employers take into account a. Plus, students take grades very personally: the grade is about them, not about their work.
