

# Infrared spaceborne remote sensing XI - 6-8 August, 2003, San Diego, California, USA

## SPIE - Infrared spaceborne remote sensing XI : 6

Description: -

-  
 Fairy tales -- Russia.  
 Folklore -- Russia.  
 Folklore -- Russia -- Juvenile literature.  
 Tales -- Russia -- Juvenile literature.  
 Artificial satellites in remote sensing -- Congresses.  
 Radiation -- Measurement -- Congresses.  
 Infrared detectors -- Congresses.  
 Infrared technology -- Congresses.  
 Remote sensing -- Congresses. Infrared spaceborne remote sensing  
 XI - 6-8 August, 2003, San Diego, California, USA  
 -  
 Proceedings of SPIE--the International Society for Optical  
 Engineering -- v. 5152.  
 SPIE proceedings series -- v. 5152 Infrared spaceborne remote  
 sensing XI - 6-8 August, 2003, San Diego, California, USA  
 Notes: Includes bibliographical references and author index.  
 This edition was published in 2003

Filesize: 60.93 MB

## Infrared spaceborne remote sensing XII : 2

At the SGP ARM site, the RMSE for TPW as compared with that measured by the MWR was reduced to 2. The Front Cover: Standard and Colour Enhanced Pansharpening of Quickbird Imagery - Sydney, Australia. The total weight is 7.

## Infrared spaceborne remote sensing XI : 6

That emissivity has been measured at instrument level during pre-launch calibration by viewing an external target at the same temperature as the IFC while varying the calibration mirror temperature. These materials include dry grass, river-washed stones, ice and snow, seawater, Santa Barbara sandstone, salty soil, twenty-two types of leaves and pine needles, and surface samples from Concord Massachusetts, Lamont Oklahoma, the Nebraska soil laboratory, Goleta Beach, and Koehn California, Death Valley and Railroad Valley Nevada, and Page Arizona.

## Infrared spaceborne remote sensing 11 : 6

IEEE Signal Processing Magazine, 25 2, pp. University of Calgary, 20 p.

## Compressive Sensing Resources

September 2003 - Invited talk at the International Conference on Antenna Theory and Techniques ICATT03, Sevastopol, Crimea, Ukraine. HIRDLIS is a mid-infrared limb emission sounder which will measure the concentration of trace species and aerosol, and temperature and pressure variations in the Earth's atmosphere between about 8 and 100 km altitude on a finer spatial scale than has been achieved before.

## INFRARED SPACEBORNE REMOTE SENSING AND INSTRUMENTATION XVI

This granule is in the north-central Sahara Desert and is also shown in , although the color scale range is different. The data presented indicate an orderly change in transmission with decreasing temperature for the various sample resistivities.

## **Volume Table of Contents**

Revised and resubmitted to IEEE Trans.

### **Infrared spaceborne remote sensing and instrumentation XV : 27**

Zhang 2011 : Error analysis of corner and center points for image registration, Canadian Journal of Remote Sensing, Volume 37, No. Several topographic attributes, such as elevation above mean sea level , relative relief, slope, aspect, curvature, slope-length and -steepness LS factor, terrain ruggedness index TRI , topographic wetness index TWI , hypsometric integral I hyp and drainage network attributes stream number and stream length of two tropical mountain river basins, viz.

### **Infrared spaceborne remote sensing XI : Optical Science and Technology SPIE's 48th annual meeting : 3**

Zhang 2010 : Image fusion for land cover change detection. International Journal of Communication Systems, Article first published online: 14 Dec.
