**Staff view: Han'guk künse myōng nonsölchip :**

. Considered representative of the debates among Korean and between Korean and Japanese intellectuals of the colonial period, these texts shed light on relatively unexplored aspects of colonial intellectual life and take part in current conversations around the nature of the colonial experience and its effects on post-liberation Korean society and culture. Two classes of vesicles are present and change in relative proportion during post-embryonic development of rectifying electrical synapses in conservatuon crayfish.
