Tetanus

However, the antitoxin can neutralize only toxin that hasn't yet bonded to nerve tissue.

Tetanus (Lockjaw): Causes, Symptoms, and Diagnosis

They produced tetanus in rabbits by injecting pus from a person with fatal tetanus into their sciatic nerves.

Tetanus (Lockjaw): Causes, Symptoms, and Diagnosis

Tetanus infection can be life-threatening without treatment. After you clean the wound, apply a thin layer of an antibiotic cream or ointment.

Tetanus (Lockjaw): Causes, Symptoms, and Diagnosis

This is a three-in-one vaccine that protects against , , and tetanus. Spores of the bacteria can be found in dust, dirt, and animal droppings. The etiology of the disease was further elucidated in 1884 by and , two pathologists of the , who demonstrated the transmissibility of tetanus for the first time.

Tetanus

The disease occurs almost exclusively in persons inadequately immunized.

Tetanus Vaccination

Your doctor will perform a physical exam to check for symptoms of tetanus, such as muscle stiffness and painful spasms. Tetanus toxin specifically blocks the release of the neurotransmitters and from inhibitory neurons.
