Convergences among stylistic response measures from objective personality tests. Neuropsychology: The study of brain and behavior.

## Animal Motivation

For the anger subscale, the anger prompt elevated ratings significantly more than any except the fear prompt. Secondary drives, by contrast, originate externally; they are environmental determinants. Placing treated and untreated individuals together will allow for tests of dominance.

**A categorized list of motivation definitions, with a suggestion for a consensual definition**

Both the POMS and MAACL lack subscales for certain basic emotions e. London and New York: Cambridge University Press, 1950. Baltimore: University Park Press, 1979.

## The Discrete Emotions Questionnaire: A New Tool for Measuring State Self

Questions about motivation, then, are questions about the causes of specific actions.
