Adaptation means that a trait of an organism has a function for the survival and reproduction of the individual, because it has been naturally selected. I find this to be extremely valuable as this is one of my criterion on my weekly discussion rubric; A What do you think section gives research based information on selected topics of controversy and has students think critically about the topics; Dig Deeper; teaches students to move beyond a typical cursory exploration of specific topics. Interface rating: 5 Great formatting.

An Introduction

Content Accuracy rating: 3 In the spirit of simplification and parsimony, the author omits some information that better shows the complexity and nuance of some of the phenomenon. Modularity rating: 5 The text is structured in such a way as to allow the instructor to reorganize the order in which to present the chapters.
