Environmental determinants of fish abundance in the littoral zone of gravel pit lakes

SDF and conductivity loaded on separate axes Table S1 and Fig. Littoral structures are known to be crucial for the lifecycle of certain lentic fish species e.

Deep Lakes Park

Parking lot for Pond 3 From the intersection of Colorado Blvd and 88th Ave head west about 0. The BRT output was displayed by using partial dependence plot to show the effect size of a variable on the response after accounting for the average effect of all other variables Elith et al. For example, after controlling for lake-level impacts rudd *Scardinius erythrophthalmus* Linnaeus, 1758 , tench *Tinca tinca* Linnaeus, 1758 and northern pike *Esox lucius* Linnaeus, 1758 have been found to be more abundant in complex habitats formed by submerged and emerged macrophytes, while European eel *Anguilla anguilla* Linnaeus, 1758 , perch *Perca fluviatilis* Linnaeus, 1758 and roach *Rutilus rutilus* Linnaeus, 1758 have been preferentially found in woody habitats Perrow et al.

Fishing the ‘Burbs: Small Suburban Ponds Offer Big Fun for Anglers

Nevertheless and in line with literature, we also saw a strong relevance of our productivity index for abundances of cyprinids, particularly roach and tench, in the littoral zone.

Thornton Gravel Ponds #2 & #3

In eight gravel pit lakes, all six fish species were caught, while in three lakes only one or two of these species occurred Table.

Horcott Lake: The Finest Carp Fishing In The Cotswolds?

Conductivity and Secchi depth were measured at each sampling event above the deepest point of the lake. The catch of all six fish species of interest summed up to a total of 53,853 fishes Table.

Girton Complex

An increased relative importance of littoral zones has been reported to affect the abundance of selected fish species in lakes with limited littoral zones Gasith, ; Hampton et al. There will be a small syndicate, limited to 20 members, on the Sailing Lake as of 2020 which will cost £500. These little guys have a knack of stealing the bait while completely missing the hook.
