First Year CSCI-141 Students will be introduced to the details of program structure and the mechanics of execution as well as supportive operating system features.

## AP Computer Science A Course

They are not private accounts; they belong to the Department of Computer Science and the use of these accounts will be monitored in various ways. The BACS degree requires 4 CS elective courses 12 credits , while the BSCS requires 5 courses 15 credits.

## Concurrency (computer science)

The integration electives are courses in other departments that have strong connections with computing. If resources are inadequate to satisfy student interest in a given year, a selective admissions process will be used to evaluate applications to declare the BACS. The deadline to apply is 9am, Monday, February 22, 2021.

## Concurrency (computer science)

This theory established a precise correspondence between proofs and programs.

## Computer Science BS

Application areas include sets finite and infinite , elementary combinatorial problems, and finite state automata. Federal government officials rely on the CRA for information that guides federal policy on computing research support.

## Concurrency (computer science)

In addition, each program has defined Student Outcomes SOs , which are are narrower statements that describe what students are expected to know and be able to do by the time of graduation.
