### What Is the General Surgery Specialty?

We frequently take on complex cases that require a higher level of care than most community hospitals can provide, and we always work with the most up-to-date emergency technology, including advanced monitoring and diagnostic equipment that allow us to perform procedures at the bedside when necessary. Some general surgeons obtain advanced training in this field most commonly surgical critical care and specialty certification surgical critical care. Considerable enthusiasm has been built around also known as robotic surgery, despite a lack of data suggesting it has significant benefits that justify its cost.

### General Surgery

The general surgeons work closely with other specialists involved in each patient's care to diagnose and provide timely surgical intervention for complex conditions. Breast surgery can also treat non-cancerous tumors that are distorting or causing problems in the breast.
