The aim of this study is to assess the intake of these foods by children, their relative contribution to overall macronutrient intake and their effects on health. According to GPS data analysis, the photo was taken at coordinates 40° 25' 12. The EXIF timestamp may also be wrong if the date and time weren't set correctly in the digital camera.

## COVID

The elevation was 664 meters. By the time the pandemic started the region had 540 available and roughly 14,000 hospital beds.

**[Consumption of sweets and snacks by a population of school children in the Autonomous Community of Madrid. The CAENPE Group]**

These measures were not welcomed by the citizens of the restricted areas, calling them unfair and even racist. More than 3,000 old people had died during that period.

Apple iPhone 4 camera has a built-in GPS receiver and allows geotagging on image files. The sample was collected through random sampling of people over 65 in Madrid, and consisted of 555 persons between 65 and 85 years old.

## **COVID**

If we keep doing this, we are becoming kings and masters of the social-health management in Madrid autonomous community.

**Photo taken at Calle de Alcalá, Recoletos, Salamanca, Madrid, Área metropolitana de Madrid y Corredor del Henares, Community of Madrid, 28001, Spain with Apple iPhone 4**

The relationship of age and sex with each mental disorder was examined. Results: The consumption of sweets and snacks items per 1,000 kcal is higher in boys than in girls 35. Please note that timezone was guessed using the GPS coordinates and may not be accurate.
