Physiogeography

En accord avec la tradition expérimentale de l'École des Hautes Études en Sciences Sociales, elles participent à l'exploration de nouveaux champs de savoirs et travaillent au projet intellectuel des sciences sociales, dans la pluralité des manières de faire, des terrains et des périodes qui organisent ces disciplines. The tasks that face physical geography are the tasks of economic geography as well; an example of the mutual cooperation of these two disciplines is the collaboration of physical geographers and economic geographers in regional planning, evaluations of natural resources, and feasibility studies of large-scale regional economic projects that take into account both physical and economic geography. The most grandiose project was the Major Turkmen Canal, running across the Karakum Desert through the dried up former riverbed of the Uzboi for around 1,100 kilometers with two water reservoirs and hydroelectric stations on the path to the Caspian Sea.
