Biographies: Scientists and Inventors

We call this Focused Protection. Bonner's work argues for the underappreciated role that randomness, or chance, plays in evolution. Join us this summer as two world-renowned thinkers, and , discuss and debate the nature of science! He also serves as the director of the Joint Center for Translational Medicine, which joins Caltech and UCLA in a program to translate basic science discoveries into clinical realities.

23 Black Female Scientists Who Changed The Damn World

Not only did these instruments help to decipher biological information, they also introduced the concept of high-throughput data accumulation through automation and parallelization of protein and DNA chemistries. The Polish scientist studied at the Sorbonne, where she became the head of the physics lab there in the early 1900s — when women really did not teach science at European universities — and pioneered research in radioactivity. They blend their science knowledge and credibility with people management skills, entrepreneurial flair and a strong understanding of business and finance, to start their own businesses or help grow existing companies.

The 50 Most Influential Scientists in the World Today

These are the scientists we have come to depend on within the health service, forensic science, food science, health and safety, materials analysis and testing, education and many other areas. In 2011, Bard was awarded the National Medal of Science for his contributions in electrochemistry, including electroluminescence, semiconductor photo-electrochemistry, electro-analytical chemistry, and the invention of the scanning electrochemical microscope.

Coldplay

He serves on the Technology Advisory Board of Monsanto, formerly Biologics, a company focused on development of RNAi products for honeybee health and various veterinary and agricultural applications. They might be developing products or services, ideas that change behaviour, improvements in health care and medicines, or the application of existing technology in new settings.

Coldplay

Einstein never returned to Germany, and signed a letter to President Roosevelt alerting him to the fact that Germany might be developing an atomic weapon. Meet explorer scientists: Investigator scientist The Investigator Scientist digs into the unknown observing, mapping, understanding and piecing together in-depth knowledge and data, setting out the landscape for others to translate and develop.
