Believing in Treatments That Don't Work

After much debate about how to reform education and how to structure expertise in the Republic of Virtue, in 1793 the Academy was closed as an institution and its resources dispersed. To place evidence above ideology, researchers and analysts must be trained in critical analysis, have no conflicts of interest and be a diverse group.

Scion of a Ukrainian peasant family, Trofim Denisovich Lysenko began his work as an agronomist in the 1920s in an agricultural station near Baku. If doctors are reluctant to use evidence, how much more so are patients? Important discoveries and innovations came from these institutes. Science used to be neglected as a building block of totalitarian ideologies.

Resentment of royal privilege and corporate prestige were mainly responsible the closing of the Academy. It was only a different doctor—someone he respects—who talked him out of it, and of course, refused to write the prescription. Many scholars continue to see scientists as victims of totalitarianism.
