Malden, MA: Blackwell Science, 2000. Estuaries are both beautiful and ecologically bountiful. Estuarine, Coastal and Shelf Science.

### estuary

However, large numbers of bacteria are found within the sediment which has a very high oxygen demand. Common finfish in Georgia's estuaries include black drum, croaker, flounder, red drum, sheepshead, spotted sea trout, striped mullet, and whiting. Fresh and salt waters mix in estuaries either as a two layered system with the lighter freshwater on top, or as well mixed waters in areas where the incoming saltwater dominates the freshwater flow from upland rivers and streams.

### Basic Information about Estuaries

Many species of and have various methods to control or conform to the shifts in salt concentrations and are termed and. The marshes develop in estuaries where the rate of sedimentation equals or exceeds the rate of rising sea level.
