10 major threats to Aboriginal land

He is also a trustee of the Sussex Archaeological Society and Chairman of the Brighton and Hove Archaeological Society. I also am a part-time falconer, but that is a different story for a different time. Again it seems badly truncated, but it is the only platform barrow I have knowingly visited, so it is worth a look.

Samantha Stein

The Society have recently completed the excavation of a cross ridge dyke within Pudding Bag Wood Stanmer. Administering federal laws and regulations relating to Native Americans: Practical processes and paradoxes. However, if it was a barrow it is possible that some of the Roman coins recorded by Hamper and the other prestige items and weaponry alleged to be found within the enclosure may have originated from it as primary or secondary deposits.

Downland settlement and land

The current trustees of the Council for British Archaeology South-East are drawn from all of the counties within our region and perform a wide range of public and private roles. A number of sites are being investigated this year. This photo was taken in February 2005 when a road still covered parts of the Aboriginal rock art.

Samantha Stein

If you are feeling energetic, take what I call the 'pilgrims' steps up the North face. The pottery was concentrated in the ditch section. The Nazca lines: Patterns in the desert.

Committee

The Pudding Bag Wood cross ridge dyke was the subject of an excavation in the 1960's, but apparently little was found. While it was perceived

that the earthworks were artificial, no dating was attributed to the construction. In the recent past, the most significant threats to these landforms have been associated with quarrying, but future climate change may bring new challenges, associated both with changing natural threshold conditions and with flood risk management.
