### Mark Rothko

Rothko gained American citizenship on 21 February 1938, in response to the rising threat of Nazism in Europe. The resulting painting had a light-hearted quality to it, while at the same time providing a clear narrative of the joyful life experience of being by the sea.

### The Painting Techniques of Mark Rothko (video)

His stylistic evolution, from a figurative visual repertoire to an abstract style rooted in the active relationship of the observer to the painting, embodied the radical vision of a renaissance in painting. His unique approach to art brought him into direct contact with his paints and canvases in a similar way to Jackson Pollock and this left finger prints and other surface dirt on many of his paintings. During this era, he was also earning more from commissions because of his large-scale works.

### Mark Rothko Paintings

He and Gottlieb believed that art should be an adventure of exploring an unknown and mysterious world. However, he did follow the medical advice given not to paint pictures larger than a yard in height, and turned his attention to smaller, less physically strenuous formats, including acrylics on paper.
