### Why Is There a Bat in My House at Night?

Related: How many bats are there and what species are where? Reviews have found different answers as to whether bats have more zoonotic viruses than other mammal groups. The sounds bats make can be absolutely deafening to bats themselves — the equivalent of holding a shrieking smoke detector up to your ear if the sound were within human hearing range. Wings and flight Little brown bat take off and flight The finger bones of bats are much more flexible than those of other mammals, owing to their flattened cross-section and to low levels of near their tips.

### The Lives of Bats

Others have been injured by fruit tree netting or barbed wire.

Around twenty years later, the German naturalist gave them their own order, Chiroptera. Accumulated in their roosts may cause the respiratory disease histoplasmosis in humans.

### Bats: Flying Mammals Active at Night

Bats begin to hibernate from late fall until spring arrives.

### The Lives of Bats

A few common bat species in North America are the big brown bat , the little brown bat , and the Mexican free-tailed bat. Bats need each other

to stay warm and prefer to nest together.
