Investigation of Local Fisheries Resources of the Labrador Coast

This research provides baseline environmental information on Bonne Bay as a potential candidate for a National Marine Conservation Area. This will be achieved through a spectrum of programs, services, and supports. Whether economic benefits are compatible with the biological goals of the region would appear to be highly dependent upon the efficiency of the management structure in enforcement measures and public education.

Species composition and habitat preferences of the nearshore fish fauna of Bonne Bay, Newfoundland

The Letter That Was Never Read A History of the Labrador Fishery , Good Tidings Press, St.

Species composition and habitat preferences of the nearshore fish fauna of Bonne Bay, Newfoundland

One of our projects is located in Gilbert Bay, southern Labrador. In: Fishes in Estuaries, M Elliott and K Hemingway eds.

Species composition and habitat preferences of the nearshore fish fauna of Bonne Bay, Newfoundland

Marine climate and the biogeography of surface waters in the Northwest Atlantic. Grow-out cod farming in southern Labrador. Seismic blasting and noise from drilling threatens rich habitat for whales and other ocean life.
