These other benefits are often hard to qualify such as better sleep, better cognition and ...

Maintenance of oral health in people with learning disabilities

Strategies and therapy to improve communication Before we look at the communication difficulties of others, we must first be aware of our own communication skills and how we communicate. Diagnostic overshadowing In this guideline, this is used to mean the tendency to attribute all behavioural, emotional, physical and social issues to a person's learning disability or a pre-existing condition, while overlooking the possibility that they could be symptoms of other conditions or difficulties.

Assessment of mental health problems in people with learning disabilities

At discharge, review how well this is working.

The role of learning disability nurses in providing end

Reasonable adjustments which do not need to be costly to the hospital care of people with learning disabilities are not only feasible and a statutory duty under the Equality Act 2010, but are also beneficial for all involved — and, first and foremost, for the person who has the learning disability. She appeared happy and excited about being in hospital, which was a surprise to those who knew her.

The role of learning disability nurses in providing end

Closed If you're living with a terminal illness or caring for someone, we're here with practical and clinical information, and emotional support. Sepsis was cited as a cause, or contributory cause, in about 10% of the 576 deaths LeDeR Programme, 2018.
