### Killing the competition

In the United Kingdom, one million people will be hospitalized yearly with injuries caused by head trauma.

### The 7 Worst Things About Being a Male

Evolution and Human Behavior, 33, 182—192. Gender differences in risk assessment: why do women take fewer risks than men? Hence, the best approach to consider the models prepared with the inclusion of alcohol intoxication might be that these models test the effect of alcohol on the subjective evaluation of riskiness, rather than on the increase in willingness to take risk. In African Homicide and Suicide, P.

Is risk taking a cue in mate choice? Keeping in mind that alcohol consumption itself is a risky behavior, and that other studies showed a direct effect of alcohol consumption on risk taking — , the lack of full independency of this variable within the models does not affect the interpretation of our results crucially. For Model 2 , we used the same target and predictor variables without any random variable.

### Killing the competition

Those who turned her down were both for the offer and apologetic about saying no. Results Determination of the Best Fitting Models We prepared a series of Generalized Linear Mixed Models GLMM, SPSS 24.

### The Young Male Syndrome Revisited

Journal of Risk Research, 16, 19—38. Do pretty women inspire men to discount the future? More surprisingly, the interaction between age group and riskiness revealed that for younger people risky behavior even decreases the likelihood of death. Since the sex ratio of the university students

was not equal, we performed an independent samples t-test and a Pearson correlation using SPSS 20.
