Frederic Chopin

All the piano greats completed a set of Preludes for solo piano, but why is Debussy's that little bit different? But Argerich's version has stood aside from all of that hubbub.

Frederic Chopin

In F Sharp Major 2:44 14.

Debussy

There is a strong tonal relationship between the preludes that suggests that the published order of the preludes is not arbitrary. Barrie's Peter Pan 'Les sons et les parfums tournent dans l'air du soir' and 'Les fées sont d'exquises danseuses' respectively will keep you occupied for much longer than the pieces' duration. I think the Argerich definitive.

Préludes, Op.67 (Hummel, Johann Nepomuk)

But where Bach and Chopin used their Preludes as something of a technical exercise, composing one for each musical key, Debussy's were free-form and full of his signature expressive indulgences. According to this version, Les préludes illustrates the development of a man from his early youth to maturity. Yes, there are some wrong notes in the B-flat minor Prelude which certainly don't detract from the seemingly infinite power displayed and there a few other places where newer editions, the Jan Ekier in particular, have made Chopin's intentions more clear.

Debussy

But the combination of burning, passionate music and burning, passionate pianist is unmatched. We must have been very stupid listeners; but we felt after it as if we had been stoned, and beaten, and trampled under foot, and in all ways evilly entreated.

Préludes, Livre 1 (Debussy, Claude)

In B Minor 1:46 7. Several pianists have performed the set out of order, and at least one recording, by , changes the order of the set entirely.
