Make your own wood

I just applied it, and the process was easy, It looks like I got 30 linear feet of 8 ft fence per bottle.

quizapp.evertonfc.com: Eco Advance Wood Siloxane Waterproofer Concentrate

Mildewcides inhibit mildew growth on the surface, and provide moderate protection against decay in aboveground use. Rain washes the degraded wood materials from the surface. They protect the wood from degradation and mildew attack, as do other types of WRPs.

The Home Depot Logo

I had no problems with this product. Ideal for small to medium-sized projects, the Krylon stain protects against UV protection and repels water. Stripping is also important when changing colors.

Make your own wood

These chromium oxides decrease photodegradation of the wood surface, and can increase the durability of semi-transparent stains two to three times. Although, one exception is the line of coatings—the only oil-based coating that can be applied in direct sunlight and the heat of the day.

Coat of Armor for Outdoor Wood

Compared to oil-based formulas, they are easy to clean up, have a lower odor and are often less expensive.
